MarginPoint Vending Solutions

High-Security, Low-Cost Dispensing Solutions

MarginPoint vending solutions streamline material management by controlling availability, demand, and access. Below are top features and their coinciding benefits.

Feature

1) Point-of-use (POU) solutions allow 24/7 access to materials yet enforce corporate access control policies
2) Cloud-based platform enables multi-site inventory control and real-time visibility
3) Enterprise software integration capabilities
4) Customizable employee access profiles determine permissions, restrictions and limitations
5) No ties to a specific supplier and no minimum requirements to purchase material

Benefit

1) Ensures that materials are available in the right place at the right time
2) Easily monitor and manage disbursement and replenishment of MRO inventory
3) Facilitates the exchange of POU transactional data with major ERP/MRP, customized procurement and suppliers' electronic ordering systems
4) Controls consumption and reducing inventory costs and shrinkage
5) Completely customer controlled

The powerful combination of the MarginPoint inventory management software and point-of-use solutions increases inventory visibility, reduces consumption and improves employee productivity – while reducing labor and capturing activity-based cost accounting data.

Options:

Safety Express
The MarginPoint Safety Express is a cost-effective solution for controlling a wide range of consumable inventory items. The coils are configured specific to order and can be easily replaced in the field as the need arises.

Features include:
- 24/7 secured access based on user privileges via key-pad or badge reader
- Controlled, single item dispensing
- Up to 60 SKUs per cabinet / 1440 bins max
- Automated reordering to suppliers
- Real-time inventory updates to MarginPoint inventory management software
- Flexible options to choose your own product

Contact MarginPoint directly for configuration options.
Dimensions: 30" (w) x 82" (h) x 33" (d) (0.76m x 2.08m x 0.84m)

Sentry
The MarginPoint Sentry is a cost-effective solution for controlling access to large, bulky and/or heavy items that would not typically be possible in most POU vending solutions. The ability to configure the number and size of each locker through our modular configuration options enables deployment in a wide variety of applications including check-out/check-in of commonly used tools as well as effective dispensing of kits and other bulky consumables.

Features include:
- 24/7 secured access based on user privileges via key-pad vending control
- Real-time inventory updates to MarginPoint inventory management software
- Lighted lockers and plexiglass windows for material visibility

General specifications:
- RS 232 Communication Protocol
- 1mm cold rolled steel body, 2mm cold rolled steel for the door
- Acrylic portals with 1w LED lighting
- Electrostatic powder for surface paint
- All welded construction

Contact MarginPoint directly for configuration options.
Dimensions: 45" (w) x 76" (h) x 21" (d) (1.14m x 1.93m x 0.53m)
